# SCHOOL REPORT

-AND-

VITAL STATISTICS.

# School Board's Report.

FOR THE YEAR ENDING MARCH 15, 1896.

As required by law, the School Board of the town of Grantham, would respectfully submit the following report.

We have four divisions in our school district. During the year two terms of school have been maintained in each division, except the North Grantham division, which has had three short terms; but giving to each division twenty weeks of school.

Six different teachers have been employed, some of which have done good work in the school-room, and have united with us, in maintaining the more modern methods of educating the pupil, being rewarded with successful results. In most of our schools Language has had a larger place, and has been taught with much better success. A great deal of written work has been given the pupils, so that they have been enabled to present neat and carefully arranged papers, testing their knowledge of English, and Language has not been drudgery, as in cases of learning unexplained rules and formulas, but their ability to show originality, to cultivate imagination, to reproduce the thoughts of noted authors, has been well brought out.

Greater care, too, has been noticed in punctuation, and arrangements of sentences. We believe this is becoming one of the prominent features of school work, and rightly so, and are glad to see any improvement along this line. By so much written work, the pupil is improving in penmanship, and we think written exercises on paper, greatly aid in this branch of work,

as far as neatness and accuracy are concerned, than careless slate work. In connection with this we think there has been some effort on part of teachers, to train the pupil in mental development. To so train, that he shall think for himself, making the most of his own powers, not those of another. Mental training must come through a training of the powers of thought and perception. The power to think on one subject, begets the power to think on another, and it matters not through what agency this comes, if it is fully developed.

The Board desires to speak of an impression that seems to prevail in some quarters, that it is only necessary in order to have good schools, to hire good teachers. There never was a greater mistake. To have good schools, many things are requisite. But three elements are indispensable; a good teacher, orderly and studious scholars, and parents who will aid and sustain the teacher, and encourage scholars to do their best. Slothful and indolent scholars, carping criticism and taking sides with refactory pupil against the teacher by the parent, or others, will render the work of the best of teachers of no account.

There is one other matter, of which we feel competed to to speak. There is reason to believe that in some of our schools, there are boys that are in the habit of using profane language. This is a sad state of things; but of it's truthfulness there is no doubt. Are not parents in a great measure responsible for the existence of this evil? We trust in the near future, that the parents and friends of education, will support teachers, and others, in authority, to that extent that it may be utterly abolished, in and around our school grounds.

Our school buildings are in fairly good condition. The school house at the Village has been Re-shingled and Kalsomined, by the Committee on repairs.

Respectfully submitted,

MRS. CLARA B. HOWE, School Board of FRED C. LEAVITT, Grantham.
